Professional Experience

Derivatives Data Solutions (LPA Group)

12/2025 - present

DevOps Engineer

- Led migration of on-premises server infrastructure into a data center incl. a Virtual Desktop Infrastructure (VDI) platform; reduced power consumption from 19 kW to ~4 kW and administrative overhead through automated orchestration (Kestra, Ansible, Terraform).
- Migrated multiple legacy projects from SVN to Git and built GitLab CI/CD pipelines, including subsequent migration to Azure DevOps.
- Selected server hardware and independently set up and optimized a Proxmox virtualization environment with 82 VMs, including monitoring (Prometheus, Grafana).
- Built a central certificate and secrets management system (HashiCorp Vault, custom PKI) to raise compliance standards and automate the certificate lifecycle.
- Modernized the internal employee platform (React, AG Grid): redesigned the UI for more performant data processing and extended core functionality.

ODAV AG - Gesellschaft für Informatik und Telekommunikation

09/2022 - 07/2025

IT Specialist in Application Development (Apprentice)

- Built automated CI/CD pipelines (GitLab, Kubernetes, ArgoCD, ESLint) to increase system stability and improve developer workflows.
- Designed and developed an application for automated literature and media management (Tesseract OCR, Elasticsearch, Liquibase) to digitize internal administrative processes.

Education

Berufsschule 1 Landshut (Vocational School, IHK)

09/2022 - 07/2025

Herzog-Ludwig-Mittelschule Bogen (Secondary School Diploma)

11/2017 - 07/2022

Languages

German: Native, Russian: Native, English: C2

Skills

DevOps & Infrastructure:

Proxmox, HashiCorp Vault, Traefik, Terraform/OpenTofu, Ansible, GitLab CI/CD, Kubernetes, Docker, Kestra, ArgoCD, Prometheus, Grafana, Icinga, Keycloak, BetterAuth, Azure, Hetzner, Cloudflare

Development & Tools:

Vue.js, TypeScript, Java, Three.js, PostgreSQL, TailwindCSS, React, Ionic, Node.js, Liquibase, Go, REST-APIs, Redis, Jira, Scrum, Kanban
